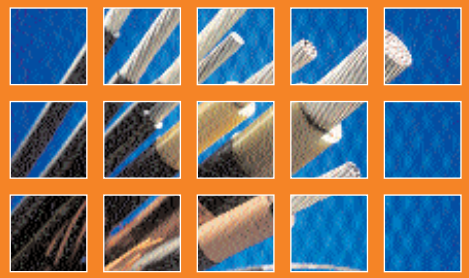
PRYSMIAN CABLES & SYSTEMS 5-35kV 1/C EPR MV-105 Power (Tape Shield)



2012.01.24

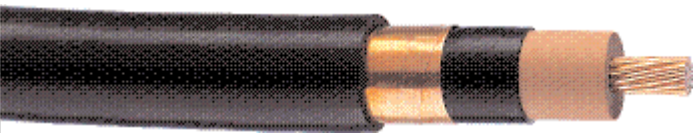
Description

Single conductor cable with stranded copper or aluminum conductor, triple extruded insulation system consisting of a thermosetting semiconducting conductor shield, high dielectric strength EPROTENAX™ EPR insulation, thermosetting semiconducting insulation shield, helically applied bare copper tape shield, and black PVC jacket.

Specifications		Ratings
AEIC	AEIC CS8*	
ICEA	ICEA S-93-639	
ICEA	ICEA S-97-682	
UL	UL 1072	Type MV-105 Sunlight Resistant For CT USE (1/0 AWG and Larger)
IEEE	IEEE 383 Flame Test	(1/0 AWG and Larger)
IEEE	IEEE 1202 Flame Test	(250 MCM and Larger)

For 105°C continuous, 140°C emergency, 250°C short-circuit operation.

*Due to a conflict between ICEA S-97-682 and AEIC CS8, all diameters will be in accordance with ICEA S-97-682 only.



Design Parameters

Conductor

- Class B compact concentric strand aluminum alloy 1350 or compact concentric soft drawn annealed copper per ASTM.

Conductor Shield

- Extruded thermosetting semiconducting shield which is free stripping from the conductor and bonded to the insulation.

Insulation

- Natural high dielectric strength EPROTENAX™ EPR-based insulation, combined with other materials and agents that enhance the electrical and mechanical characteristics assuring extended cable life.

Insulation Shield

- Extruded thermosetting semiconducting shield with controlled adhesion to the insulation providing the required balance between electrical integrity and ease of stripping.

Metallic Shield

- Helically applied non-magnetic copper tape(s) over the insulation shield with a minimum overlap of 25%.

Jacket

- Black sunlight resistant polyvinyl chloride (PVC) jacket tightly applied over the copper tape.

Options

- Strandseal®
- Compressed stranded conductors
- Colored Jackets
- CPE, LLDPE, or LSOH Jacket
- Multiplex cables
- Oil Resistant Jacket

Installations

- Conduit in Air
- Direct Buried
- Underground Duct
- Isolated in Air
- With Messenger
- Wet Locations
- Dry Locations
- Industrial
- In Cable Tray

†Ampacities are based on the following:

Information Subject to Change without Notice.

PRODUCT NOTES:

▲ Items are Prysmian authorized stock.

The above dimensions are approximate and subject to normal manufacturing tolerances.

.

Three Phase Operation

In Duct (NEC Table 310-77): Three single cables in plastic duct, direct-buried, 105°C conductor temperature, 20°C ambient temperature, earth RHO of 90°C-cm/Watt, 100% load factor, and shields short-circuited.

Isolated in Air (NEC Table 310-69): Single conductor cable, 105°C conductor temperature, 40°C ambient temperature, and shields grounded at one point.

In Cable Tray: Per NEC Article 392-13, for single conductor cables, sizes 1/0 AWG and larger, installed in a single layer in an uncovered cable tray, with a maintained space of not less than one cable diameter between individual conductors, the ampacities shall not exceed the allowable ampacities stated in Table 310-69 (Copper), "Isolated in Air" values noted above.

‡EPROTENAX™ EPR-insulated cables are capable of operating at 105°C. However, the maximum operating temperature of the cable should be based on the maximum operating temperature of the cable accessories to be used.

†Ampacities are based on the following:

Three Phase Operation

In Duct (NEC Table 310-77): Three single cables in plastic duct, direct-buried, 105°C conductor temperature, 20°C ambient temperature, earth RHO of 90°C-cm/Watt, 100% load factor, and shields short-circuited.

Isolated in Air (NEC Table 310-69): Single conductor cable, 105°C conductor temperature, 40°C ambient temperature, and shields grounded at one point.

In Cable Tray: Per NEC Article 392-13, for single conductor cables, sizes 1/0 AWG and larger, installed in a single layer in an uncovered cable tray, with a maintained space of not less than one cable diameter between individual conductors, the ampacities shall not exceed the allowable ampacities stated in Table 310-69 (Copper), "Isolated in Air" values noted above.

‡EPROTENAX™ EPR-insulated cables are capable of operating at 105°C. However, the maximum operating temperature of the cable should be based on the maximum operating temperature of the cable accessories to be used.

Information Subject to Change without Notice.

PRODUCT NOTES:

▲ Items are Prysmian authorized stock.

The above dimensions are approximate and subject to normal manufacturing tolerances.

Three Phase Operation

In Duct (NEC Table 310-77): Three single cables in plastic duct, direct-buried, 105°C conductor temperature, 20°C ambient temperature, earth RHO of 90°C-cm/Watt, 100% load factor, and shields short-circuited.

Isolated in Air (NEC Table 310-69): Single conductor cable, 105°C conductor temperature, 40°C ambient temperature, and shields grounded at one point.

In Cable Tray: Per NEC Article 392-13, for single conductor cables, sizes 1/0 AWG and larger, installed in a single layer in an uncovered cable tray, with a maintained space of not less than one cable diameter between individual conductors, the ampacities shall not exceed the allowable ampacities stated in Table 310-69 (Copper), "Isolated in Air" values noted above.

‡EPROTENAX™ EPR-insulated cables are capable of operating at 105°C. However, the maximum operating temperature of the cable should be based on the maximum operating temperature of the cable accessories to be used.

†Ampacities are based on the following:

Three Phase Operation

In Duct (NEC Table 310-78): Three single cables in plastic duct, direct-buried, 105°C conductor temperature, 20°C ambient temperature, earth RHO of 90°C-cm/Watt, 100% load factor, and shields short-circuited.

Isolated in Air (NEC Table 310-70): Single conductor cable, 105°C conductor temperature, 40°C ambient temperature, and shields grounded at one point.

In Cable Tray: Per NEC Article 392-13, for single conductor cables, sizes 1/0 AWG and larger, installed in a single layer in an uncovered cable tray, with a maintained space of not less than one cable diameter between individual conductors, the ampacities shall not exceed the allowable ampacities stated in Table 310-70 (Aluminum), "Isolated in Air" values noted above.

‡EPROTENAX™ EPR-insulated cables are capable of operating at 105°C. However, the maximum operating temperature of the cable should be based on the maximum operating temperature of the cable accessories to be used.

Information Subject to Change without Notice.

PRODUCT NOTES:

▲ Items are Prysmian authorized stock.

The above dimensions are approximate and subject to normal manufacturing tolerances.
